OVERVIEW

OFFICE LOCATIONS

- Colorado
- Georgia
- New Mexico
- Tennessee
- Texas
- Canada
- Mexico

Since its founding in 1955, Merrick has been a pioneer in advanced mapping technologies, services, and products. From involvement in light detection and ranging (LiDAR) and digital imagery to hyperspectral imagery and multi-sensor data fusion, Merrick is continually recognized for outstanding client service, product quality, and innovation.

RELEVANT MARKETS

Merrick's full-service geospatial solutions team meets the planning, acquisition, mapping, documentation, and application needs of a variety of markets.

- Energy
- Security
- Government
- Infrastructure

Beginning-to-end services are what you'll experience with Merrick. The firm provides project planning, multi-sensor data acquisition, and data processing and integration - all supported by advanced technical resources and personal client service.

SERVICES

- LiDAR
- Hyperspectral imagery
- Ortho imagery
- Multi-sensor data fusion
- Terrestrial scanning
- Surveying
- Satellite imagery
- MARS® software
- Application development

PROFESSIONAL AFFILIATIONS

- American Congress on Surveying and Mapping (ACSM)
- American Society for Photogrammetry and Remote Sensing (ASPRS)
- Association of State Floodplain Managers (ASFPM)
- Management Association for Private Photogrammetric Surveyors (MAPPS)
- National States Geographic Information Council (NSGIC)
- Urban and Regional Information Systems Association (URISA)
- US Geospatial Intelligence Foundation (USGIF)

BUSINESS PARTNERS

- Blue Marble Graphics
- DigitalGlobe
- Environmental Systems Research Institute (ESRI)
- ERDAS
- GeoEye

CORPORATE OVERVIEW

Merrick & Company, an employee-owned geospatial solutions, surveying, engineering, architecture, and design-build firm, serves domestic and international clients in the geospatial/mapping, infrastructure, security, energy, and life sciences markets. Merrick maintains eight offices in the US as well as offices in Canada and Mexico.
